The Evolution of AI

From rule-based systems to autonomous agents —
six decades that rewired how machines think.

• SERIES • 02

What is an AI Agent?

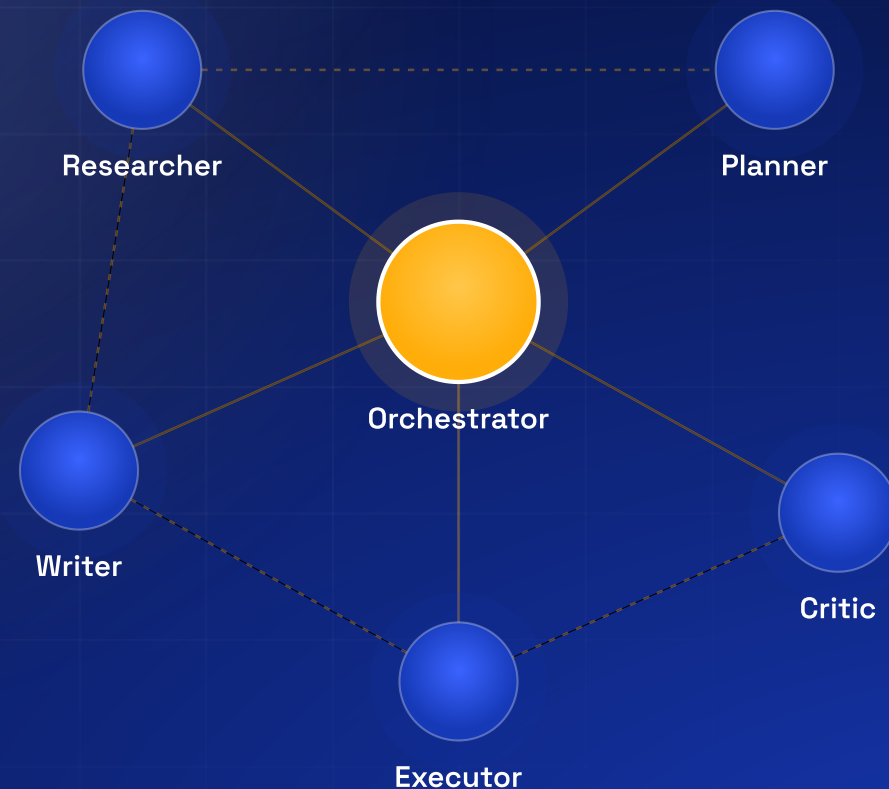

Software that perceives its environment, decides what to do, and takes action — autonomously, with a goal in mind.

• SERIES • 03

Multi-Agent Systems

One agent is smart. A network of specialised agents — communicating, coordinating, dividing labour — is transformative.

SERIES • 04

The Agentic Workflow

A loop, not a script. Agents plan, use tools, and reflect — until the goal is met.

01

Goal

User intent

Why Nexauratechs?

We don't sell hype. We ship agentic systems that move your numbers.

Build

Custom agents, fitted to your stack.

Orchestrate

Multi-agent systems that scale.

Operate

Production-grade reliability, day one.
